

K1 AO Bench

Version 1.01 09/23/2025

K2 AO Bench

Index

BDM: Boston Deformable Mirror
 CRED2: IR camera
 DFB: Dichroic Fold Beamsplitter
 FAM: Fiber Alignment Mirror
 FC: Fiber Chuck
 FEB: Fiber Extraction Bundle
 FIB: Fiber Injection Bundle
 FW: Filter Wheel
 ISM: NIRSPA0 pickoff
 KPIC: Keck Planet Imager and Characterizer
 KS: KPIC Source
 Mod: Pyramid Modulator
 MP: Multiport
 NFP: NGS Field Positioner
 NIRC2: IR Imager
 NIRSPA0: Reimaging optics for NIRSPEC
 OFM: OSIRIS Fold Mirror
 ORKID: Fast Visible Camera
 PDB: Pyramid Dichroic Beamsplitter
 PD: Photo Diode
 PHM: Pinhole mask or polarimeter plate
 PyWFS: Pyramid WFS
 RP: Pyramid Roof Prisms
 Saphira: IR camera
 SCALES: IR imager and IFU spectrograph
 TC: KPIC Tracking Camera (Shown in ZWFS configuration)
 TCP: Tracking Camera Pickoff
 TCO: Tracking Camera Optics
 VC: Vortex Coronagraph
 ZWFS: Zernike WFS
 ZM: Zernike Mask

See K1 for common elements

* FEB and PD are mounted on the underside of the bench. Under the SHWFS

Change Log

K1

- Version 1.01:
 - Corrected PHCM to PHM for Pin Hole Mask
 - Corrected PHM as deployable
- Version 1.0: Initial release

K2

- Version 1.30:
 - Removed NIRSPAO plate and related KPIC and NIRSPAO optics
 - Removed ISM
 - Reclassified the TPM as a fixed optic
 - PIAA removed
 - PSM removed
 - FIB and FEB are now fixed as only KL bundle remains
 - PD now exist under bench
 - TelSim removed and SCALES TelSim placed as planned.
- Version 1.20:
 - Replaced the SFP with the PCU
 - Added additional definition of PHM to be the Pin hole mask or the polarization half wave plate.
 - Changed the OFM from planned to in place
- Version 1.10:
 - Changed the CCD39 in the WFS to the OCAM2K
- Version 1.01:
 - Moved KPIC FEU lens to inside the PSM as the fibers are attached to the lens and the entire fiber + lens unit are moved by the PSM.
 - Added a box to show the KPIC Multiport(MP) which includes the FIB and lens as they are attached.
- Version 1.0: Initial release
